

One of the point of internationalization strategy of KNU is globalization which is nothing new for us. We welcomed first international students in 1952. They were from Cuba and Africa. Even in the hard days for Ukraine, we try to be attractive on the international level, support existing and develop future relations in order to invite new foreign students, creating good conditions for adaptation period, studying, living and socializing. Our graduates represent Kryvyi Rih National University world-wide and successfully realize obtained theoretical and practical knowledge. University takes part in Erasmus+, Horizon 2020, DAAD, Fulbright, FEFU and other international programs.

When we talk about Kryvyi Rih National University and look through its history, the first thing that come to our mind is a region where the university is located. Kryvyi Rih National University is a leading educational-scientific center for training skilled specialists in the sphere of different kinds of engineering, ore-mining, metallurgy, ecology, economy for Central region of Ukraine, and first of all – Dnepropetrovsk region. Nowadays it is a huge structure, which comprises 6 faculties: mechanical engineering and transport technologies, civil engineering, electric engineering, information technologies, business administration and economy, mining-metallurgical; 2 research institutes (Mining Institute and the Institute of Labour Safety and Ecology in the mining and metallurgical industry); 8 training colleges and technical schools; center of preparatory and postgraduate education, etc.

In 2022 KNU celebrates its 100th anniversary with new achievements in science and education. Long time ago it started to operate as a huge academic ore-mining and metallurgical center. Due to city location where extraction of iron ore is on the first place in the world, our students and graduates have a great opportunity not just to get theoretical knowledge but also obtain invaluable practical experience on the local enterprises. We can be proud of the best specialists graduated from our university who have been working as top-managers at mining-metallurgical companies around the world.

FACULTIES:
•MINING AND METALLURGICAL

- SPECIALTIES**
- Mining (underground and open pit), surveying, mine construction;
 - Labour Safety
 - Metallurgy
 - Geology
 - Ecology, Environmental Protection
 - Computer Sciences
 - Computer Engineering
 - Software Engineering and Automation
 - Transport Technologies and Logistics
 - Programming Engineering
 - Professional pedagogy
 - Applied Mechanics
 - Motor Transport
 - Industrial engineering
 - Heat Power Engineering
 - Electric Engineering and Technologies
 - Electro Mechanics
 - Enterprise Economics
 - Finances, Banking and Insurance
 - Accounting and Audit
 - Management and administration
 - Law
 - Construction and Civil Engineering
 - Geodesy and Land Management

•INFORMATION TECHNOLOGIES

MECHANICAL AND TRANSPORT ENGINEERING

•ELECTRICAL ENGINEERING AND TECHNOLOGIES

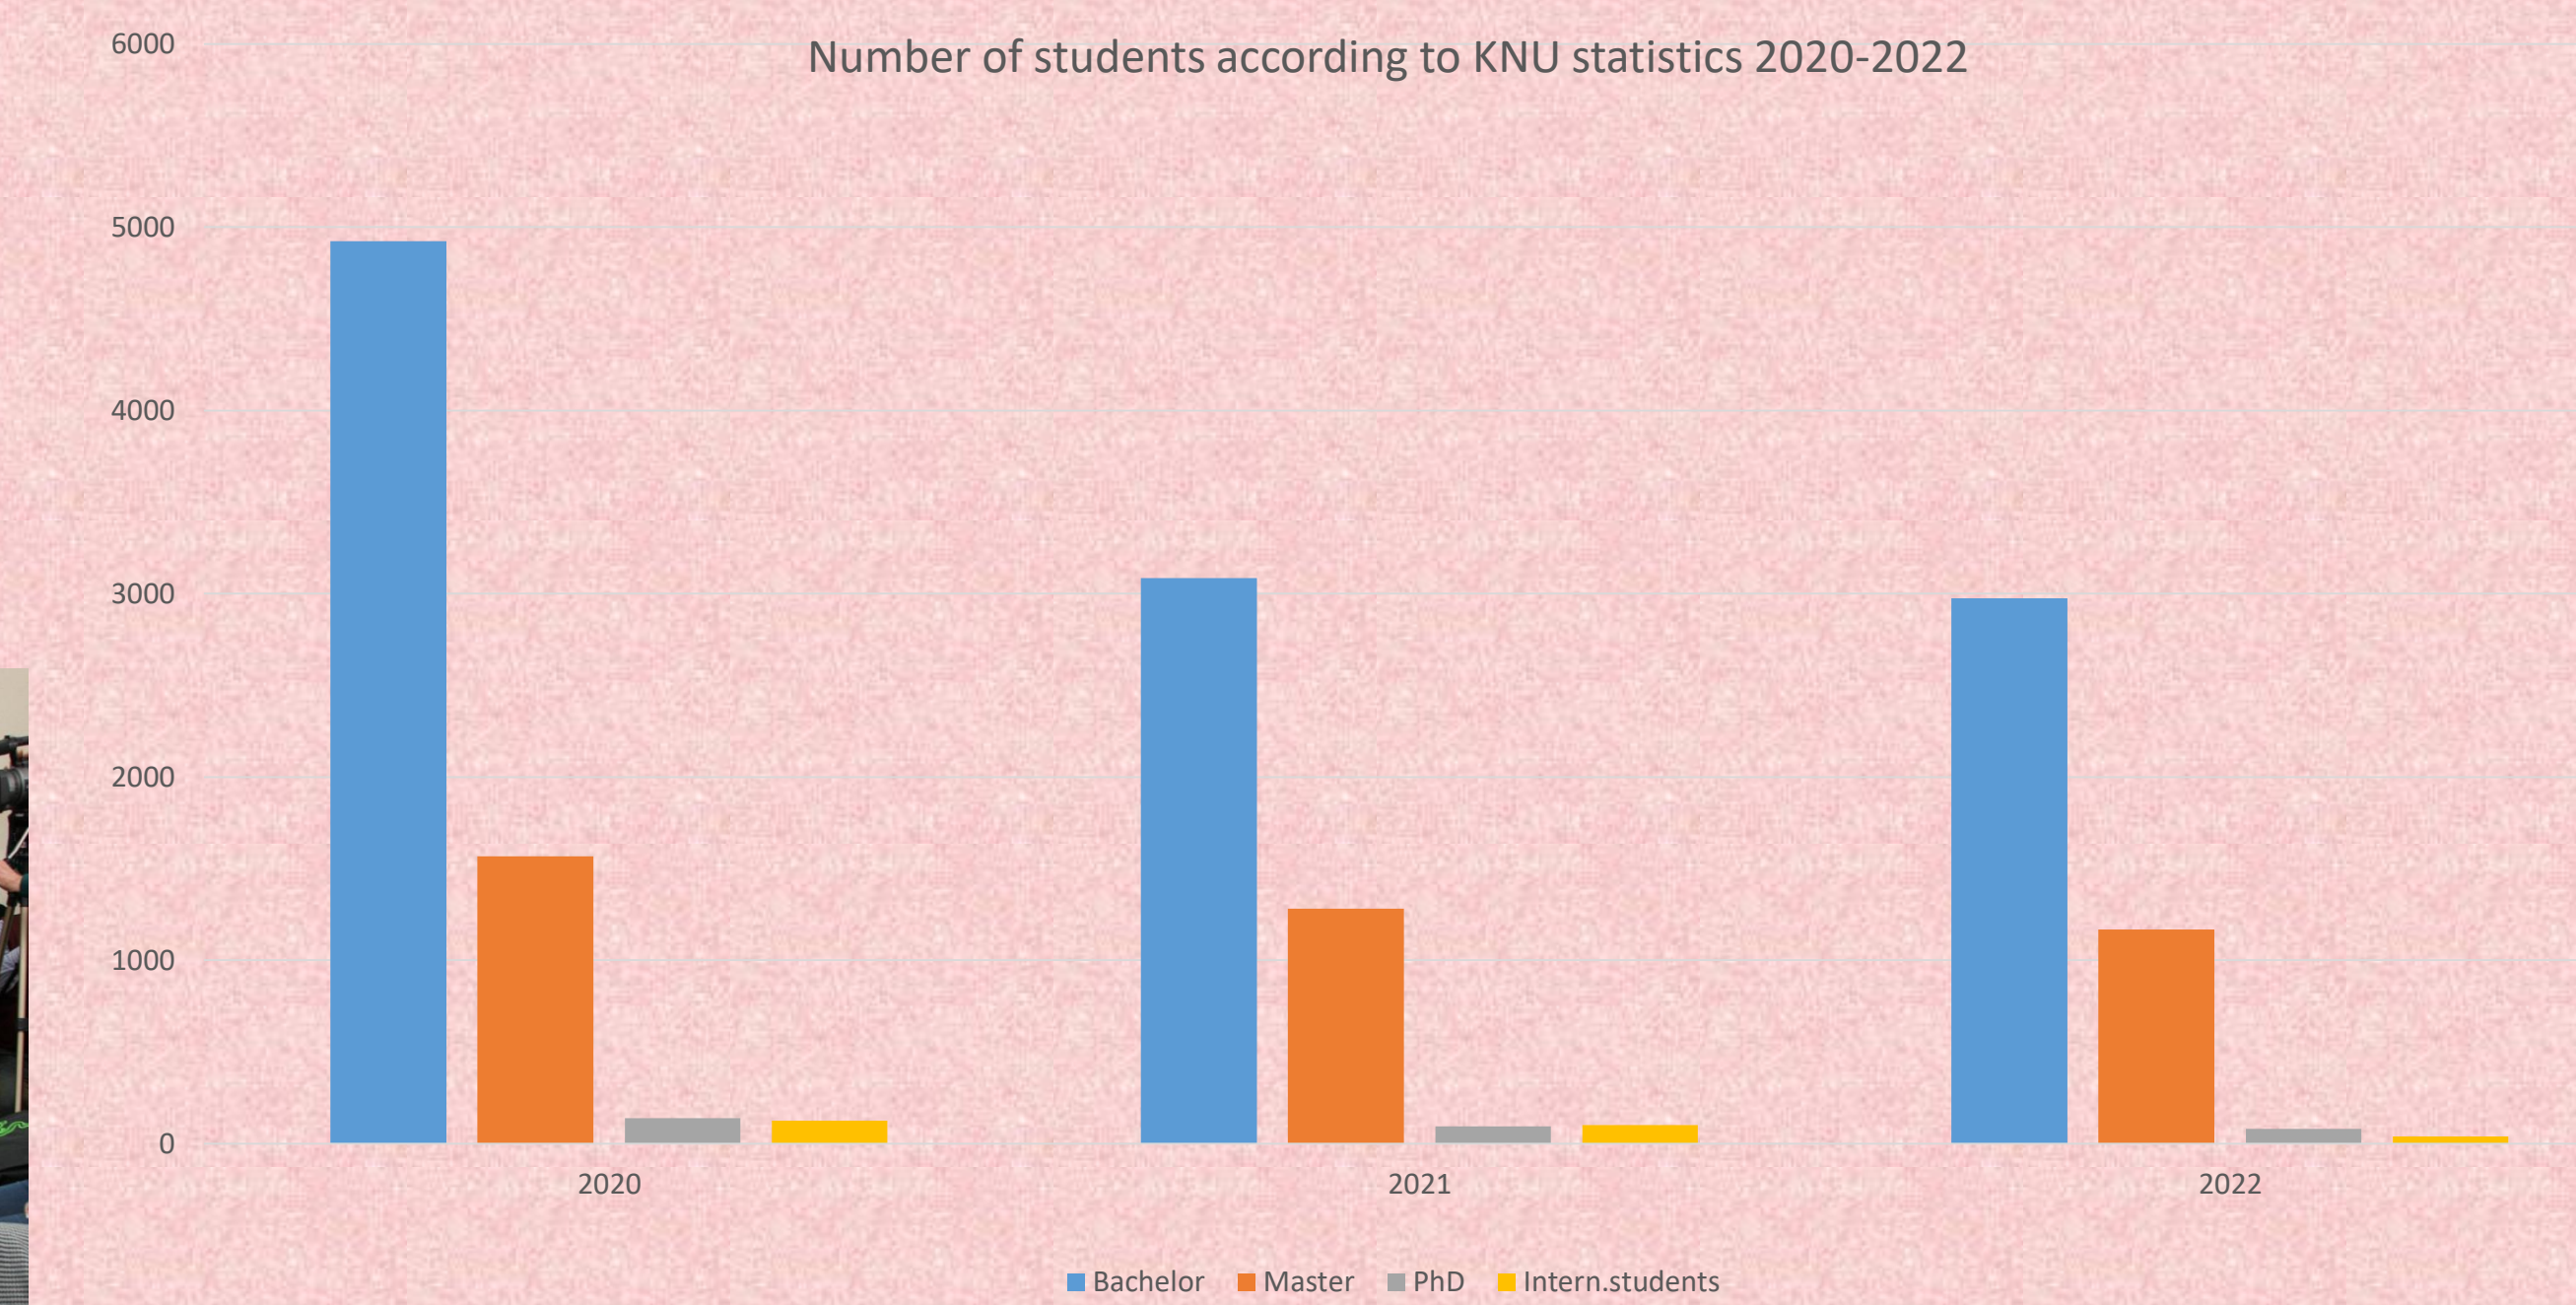

•ECONOMICS, BUSINESS MANAGEMENT AND LAW

•CIVIL ENGINEERING

The University has an international network, and cooperates with partners around the world at every level – from research, studies and teaching to administration. KNU cultivates partnerships with about 100 universities worldwide to foster international cooperation.

Due to the framework of bilateral student exchange agreements, our students have an opportunity to study abroad for one semester or to write their final thesis abroad where their previous studies are fully accredited. It is also possible for many students to complete their practical semester abroad.

- Vice Rectors**
- Mining-metallurgical
 - Economics and Business administration
 - Construction engineering
 - Information Technologies
 - Electric engineering
 - Mechanical engineering and transport technologies
- Structural units:**
- Quality assessment department
 - IT and marketing department
 - Continuous education department
 - International relations department
 - Research department
 - Education and methodology department
 - HR department
 - Library
 - Civil Safety department

- Colleges:**
- Transport, Polytechnic, Industrial, Mining, Electric and mechanical engineering
